

PUBLIC NOTIFICATION
MEADVILLE AREA WATER AUTHORITY
ADDITION OF FLUORIDE INTO DRINKING WATER

This notice is for the Meadville Area Water Authority customers. The Pennsylvania Department of Environmental Protection (PaDEP) has granted permission to feed fluoride through the issuance of a permit. While fluoride occurs naturally in our source water at a level of approximately 0.1 milligrams per liter, we will be increasing the concentration to a more therapeutic dose of approximately 0.7 milligrams per liter. The Meadville Area Water Authority will commence feeding fluoride on August 28, 2019 in accordance with PaDEP regulations.
